East Asian Science, Technology, and Medicine

EASTM is published by the International Society for the History of East Asian Science, Technology, and Medicine (ISHEASTM) and edited by Hans Ulrich Vogel at the University of Tübingen, Germany. The publication of this peer-reviewed periodical has been supported by a grant from the *Deutsche Forschungsgemeinschaft* (DFG) since 1999. The journal is dedicated to the study of traditional and modern East Asian science, technology, and medicine. Any study based on original research using Chinese, Japanese, or Korean primary sources or artifacts, that elucidates the relationships and interactions of science, technology, and medicine with politics, society, economics, philosophy, culture, religion, historiography, as well as their disciplinary traditions, or throws light on the work of scientists, technologists, and physicians in East Asia will gladly be considered. In contrast to other journals in the field, *EASTM* has no page limitations and thus also publishes longer articles rich in empirical documentation.

Potential contributors are encouraged to correspond with the editor before submitting manuscripts in order to ensure that their work falls within the purview of *EASTM*, and to simplify the preparation of the final copy. All contributions except invited reviews are refereed.

The D. Kim Foundation

for the History of Science and Technology in East Asia

現代東亞科學技術史

P. O. Box 693, Winchester, MA 01890, U.S.A.

Website: www.dkimfoundation.org

Hideki Yukawa and Sin-itiro Tomonaga

Tsung-Dao Lee and Chen Ning Yang

Established in 2008, the D. Kim Foundation is dedicated to furthering the study of the history of science and technology in modern (primarily 20th century on) East Asia. The Foundation provides annual fellowships and grants to encourage and support graduate students and young scholars in the field. Comparative studies of East Asia and the West as well as studies in related fields (mathematics, medicine and public health) are also welcome. Fellowships and grants are not limited to students studying in US universities, and students in non-US universities are strongly encouraged to apply.

For more information, see www.dkimfoundation.org

LIST OF PARTICIPANTS

The 25th International Congress on the History of Science and Technology will take place in Rio de Janeiro, Brazil, 23-29 July 2017.

**Congress Theme:
Science, Technology and Medicine between the Global and the Local**

Questions of place are gaining increasing importance in the work of historians of science, technology and medicine, to such an extent that some scholars suggest this amounts to a veritable "spatial turn". It is unavoidable that researchers take sides on issues such as the situatedness of knowledge and practices, the problems pertaining to their movements across spaces and cultures (and not only along time) and, above all, the proper choice of scales of analysis - all the way **between the local and the global**, theme of the 25th International Congress of History of Science and Technology. At the same time, this theme relates to the very nature of the Congress as the largest international gathering of historians of science, technology and medicine, inviting all of us to think about what we may say to and learn from each other, considering our own multifarious places and standpoints.

Deadline for Symposium Proposals: Saturday 30 April 2016
